---------------	------------	---------------------

To perform regulated work, Gas Fitters must be employed by a registered Gas Contractor or must be Gas Contractors themselves.

To become a Certified Gas Fitter, you need to obtain the appropriate Gas Certificate of Qualification. Information on how to obtain a Certificate of Qualification is detailed in Division 2 of the Gas Safety Regulations and can be found on the Technical Safety BC's website.

GAS CONTRACTOR RESPONSIBILITIES AND OBLIGATIONS

As a Registered GAS CONTRACTOR in British Columbia, your responsibilities and obligations include but are not limited to the following:

1. Be familiar with the Safety Standards Act and Regulations
2. Maintain current Gas Code Books (CSA-B149.1)
3. Ensure that the necessary permit, or its equivalent, is taken out and the appropriate fee paid in a timely manner, for all gas work performed by your company.
4. Ensure, on final completion of the regulated work, a completed Notification of Completion, Installation or Alteration form is immediately mailed or delivered to the appropriate regulatory authority.
5. Ensure that all employees who sign a call for inspection, or its equivalent, or supervise the work of others are licensed gas fitters.
6. Ensure tradespersons working for you only perform work for which they are licensed and that they know their responsibilities and obligations as gas fitters.
7. Ensure that all gas appliances and equipment installed by your employees bear the label of a Canadian Certification Organization, or other approved Certification Organization whose label indicates certification to a Canadian standard.
8. Promptly correct all errors and rejections that may be incurred in gas work performed by your employees.
9. Report any explosion, fire or other incident caused by or involving gas, to a Gas Safety Officer.
10. Report any illegal or dangerous practices to a provincial or municipal Gas Safety Officer.
11. Ensure that your company's bond is continually in force.

Failure to comply with these responsibilities and obligations could lead to a hearing with the Gas Safety Manager and disciplinary action being taken.
